

Family Intensive Treatment

Bay State
Community Services

When a family needs intensive services, our family-centered and strength-based team will come to their home to meet the family's needs and goals, and provide them with practical and best practice clinical intervention that will move the family towards health and wellness.

Through Family Intensive Services (FIT), Our Team Will:

- Come to the family's home, or other preferred space, and meet with the family multiple times a week to get to know the family's needs
- Perform a strength-based, comprehensive assessment to ensure safety and stability in the home
- Develop a treatment plan that focuses on the family's and child's strengths, needs, and goals
- Assist in navigating the child service systems.
- Identify and connect the family with formal and informal community resources.
- Develop a transition plan as a step down for continued support within 4-6 months
- Connect with the school, and other providers, to fully understand what is right for the family
- Be available 24/7 to support the family during emergency situations
